Finally revealed after 29 years: the book Congress never wanted you to see...

Ron Paul's "Lost" Gold Bible.

It has nothing to do with his 2010 book, ***End the Fed***. And it isn't his 2008 tome ***The Revolution: A Manifesto***, either. Instead, it's a book that's been "locked away" for almost 3 decades. Kept virtually secret...until now.

You'll soon discover why all the secrecy surrounds this book...and why it would to your benefit to read this book now.

You'll also see why I'm doing everything in my power to get this book into your hands for FREE by following one simple step I'll show you in just a minute.

You won't have to pay a dime. You won't even pay shipping. Why would I go out of my way to send you a FREE book on Gold?

Take a look at these headlines... [\(use images in HTML\)](#)

Inflation Storm Warnings: Prices Soar, The Money Supply Surges

Food Prices: High Today Even Higher Tomorrow

Food Has Been A relative Bargainbut the drought and domino effect of inflation are sending prices skyward

Investors take Refuge in Gold; Economic Doubt Drives “Nervous Money” to Metal

Investors reading these headlines start ditching dollars. They trade greenbacks in for anything of real value.

They run to gold and silver.

Gold soared 28% in 8 months...72% in 18months...and a massive 580% in a 3-year period.

And Ron Paul - the only man in Washington who "gets it" - blasts the Federal Reserve for mismanaging the nation's own currency, accusing the central bank of printing money "out of thin air" to address their own political agenda.

He explains that it's exactly because of the banks' mistakes and miscues that the only way out of this mess is by backing the dollar with something of real value; by gold, for example, the one "true money" throughout the ages.

Sound familiar?

Well it should.

These headlines come from the mainstream media in the U.S. over thirty years ago...

As I'm sure you remember, in the late 70s' money printing was running wild, prices of real goods were soaring, and investors finally caught on to precious metals, sparking a historic boom in gold and silver.

I don't show you these old headlines to entertain you with history. I show them to you to prove that history has a funny way of rhyming with itself.

I say “rhyming” rather than “repeating” because this time around, I predict the outcome will be far more difficult for you and your family. The recession in the early 1980s' was the worst since the end of World War II, but it won't hold a candle to what could happen this time around...

* Under duress, Congress will attempt massive tax increases, crippling the economy and destroying the quality of life those who manage to remain employed have come to expect...

* Just as in the early 1980s', the Federal Reserve will be forced to raise rates as investors bail on U.S. government promises... easy credit for food, energy and housing will disappear...

* Already underway, increased destruction of the dollar's purchasing power will boost the cost of food and energy to unaffordable levels...

* Also, millions more Americans will suffer from hunger, cold and extreme exposure to the elements...(look around, it's happening now)...

* Riots will erupt in the street from a desperate population as American cities and towns continue their path toward the Third World...Wisconsin was just an impolite tantrum...

With deficits running wild, money printing off the charts, and the prices of food, energy and precious metals just starting to rise, there's NEVER been a more important time to read Dr. Paul's "Lost" Gold Bible.

And that's exactly why I want to put Ron Paul's "lost" Gold Bible in your hands today...as a premium for following one easy step.

Dr. Paul wrote and submitted the book to congress in 1981. But for reasons I'll show you in just a minute, the report's findings were rudely ignored. Then the report itself was buried.

Back when the report was written, the dollar had come to be backed by nothing more than the "full faith and promise" of the U.S. government. Naturally that brought the dollar's status into question.

Back then, gold's price wasn't the only thing that rose...

* Consumer retail prices more than doubled.

* Interest rates doubled to the highest "real rates" in **200 years...**

* Personal and business bankruptcies doubled.

Back then, in the 1980's, Paul Volcker was the head of the Federal Reserve.

Back then, when the inflation rate went crazy, the "gentle giant," as Volcker was called, raised interest rates in order to attract investment in the dollar.

This eventually spurred demand for the dollar...and siphoned demand away from gold and silver. Gold and silver both fell from their highs in the 1980's as the dollar gained strength...

But that was then. This is now...

This time we have “Helicopter” Ben Bernanke heading the Federal Reserve. They call him “Helicopter” because he sees no problem with what Milton Friedman called a “helicopter drop” of money into the economy to keep prices up. According to “Helicopter” Ben:

"The U.S. government has a technology, called a printing press (or today, its electronic equivalent), that allows it to produce as many U.S. dollars as it wishes at no cost."

And it looks like “Helicopter” Ben is putting that inflated money where his mouth is...

Consider this chart...

<http://mises.org/content/nofed/chart.aspx>

Chart will not render here. Please go to link and reformat to remove copyright and with caption: “Money Supply Explosion!”

As you can see, we’re in an unprecedented period of money printing. Instead of allowing interest rates to rise, our current Fed chairman is using every weapon at his disposal to keep rates as LOW as possible to meet a political agenda most ordinary Americans don't understand.

According to a recent *New York Times* article...

Mr. Bernanke cut interest rates to near zero...helped conceive and pushed for the \$700 billion federal bailout of the financial system, and tripled the Fed's balance sheet, to about \$2.3 trillion, as he used a wide range of tools to pump money into a staggering economy.

One of those tools was QE1 and QE2...

And “QE” stands for “Quantitative Easing”...which is just a fancy way of saying “inflation.” But don’t take my word for it! Listen to “Helicopter” Ben himself... When asked what “quantitative easing” really was, here’s what he said on a recent *Sixty Minutes* interview...

“What we’re effectively doing is money printing”—Ben Bernanke.

When you look at that chart and consider what he's said, do YOU think Bernanke's going to turn off the money printing spigots anytime soon? Do YOU think he cares that this money printing could destroy the value of your savings? Or that it could cause prices to rise faster than your income can keep up?

Me neither.

This is the same man who said: *"People know that inflation erodes the real value of the government's debt and, therefore, that it is in the interest of the government to create some inflation."* - Ben Bernanke

That's right. It's in the government's interest...not yours...what you get on the tail end of "inflation" is higher prices for gas, food, housing, education, clothes, health care... in short, hardship.

Mr. Bernanke thinks you should know this and just accept that your savings and your quality of life may have to be sacrificed for the greater goals of the government.

That's why I say that history rhymes.

Last time Volcker brought the dollar back from the brink. This time—with "Helicopter" Ben at the helm—we're not likely to be so lucky.

The stakes have truly never been this high...for you...your family...or everything you've ever worked for.

No matter how high you see gold going, you won't know the full story until you read the shocking revelations in Ron Paul's "Lost" Gold Bible.

Inside, you'll find...

- * Why inflation could ABSOLUTELY kill an economy...
There may be NO OTHER outcome (Ron Paul's "Lost" Gold Bible, p 157) —this will be shown on the screen but not read.
- * How gold PREVENTS — not causes — panics and crashes (p 159)
- * How a return to a gold standard would be far less painful than maintaining the present course (p 186)
- * A glimpse into the future... when everything BUT the dollar could be used as money...(p 199)

I'll show you the one simple step to claiming your complimentary copy of this book for free at the end of this letter.

You probably remember back in 1981 things had reached crisis level...the likes of which the nation had scarcely seen.

The Federal Reserve had been creating new money faster than ever since the U.S. completely went off the gold standard in 1971. Then President Reagan called for a “Gold Commission” to explore the option of America returning to a gold standard.

That option was doomed from the start.

The President and Congress never had any real intention of putting the currency under the discipline of gold.

Why do I say this?

Because the Commission was stacked with lifelong opponents to gold! The “Gold Commission” was actually supposed to be a way to bury the idea of a gold-backed dollar...once and for all...

They didn’t count on the conscientious work of Ron Paul.

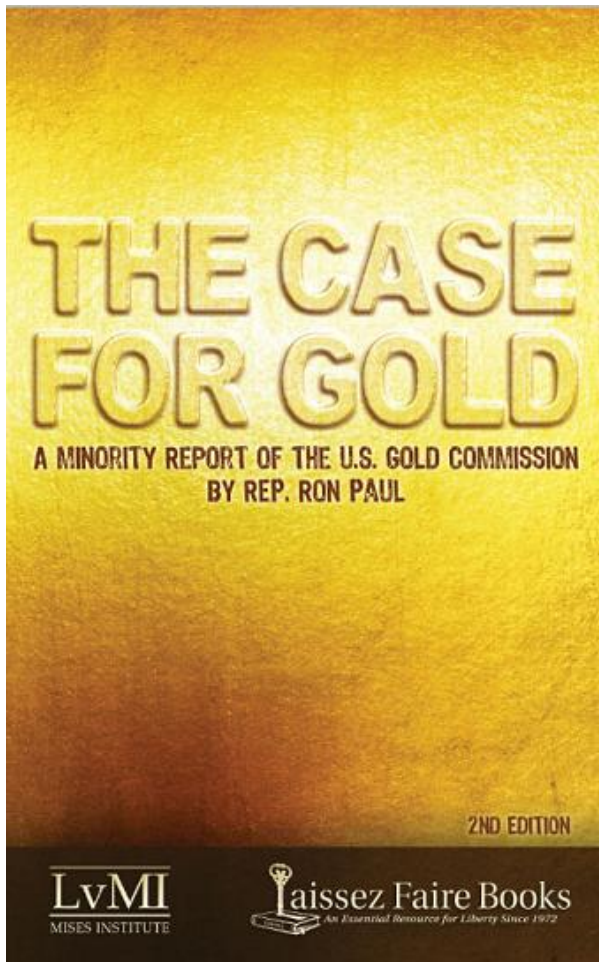

As an unassuming obstetrician from Galveston, Texas, he had come to Washington because he saw terrible things being done to the nation's currency and witnessed the direct impact on his own patients' lives. He'd read economics and monetary history. He understood the power of the government to destroy its own currency for nefarious means...

Dr. Paul was one strong voice among a minority on the commission, who disagreed with the commission's political findings.

As such, he wrote a minority report—a dissenting view—that argued so powerfully for a return to a real gold standard that it could not be refuted. So no one even tried to refute it. The report’s findings were promptly ignored. And then the report itself was left by the wayside. It was “lost” for nearly thirty years.

“Lost”...that is to say it was overlooked by the mainstream media, and shrugged off by other members of Congress.

But it had been appreciated for what it really is by the folks at the Ludwig von Mises Institute...they held on to it, waiting for the report to be called upon again when its findings could no longer be ignored...when its importance could no longer be denied.

That's why I call it Dr. Paul's "Lost" Gold Bible, even though you may know it by the dissenting opinion... or the ***The Case for Gold***.

Thirty years after the report was written, we're back on the inevitable path described by Dr. Paul in those tough days after the Bretton Woods exchange rate system had been dismantled.

This time, however, the underlying rot has had 30 years to fester. I believe it's not too late, however, to turn around...though time IS running out.

Hi, I'm Doug Hill – publisher of **Laissez Faire Books**.

Our mission is to help promote independent thought and economic clarity through continuing education. And we've been doing it for nearly 40 years now...

...Legendary economist Murray Rothbard spoke at the grand opening of the New York City bookstore in 1972. Bob Dylan even walked through the store in its early years...though he is reported to have not bought anything.

Author of ***Radicals for Capitalism*** **Brian Doherty** wrote, "The store became an important social center for the movement in America's largest city, a place for any traveling libertarian to stop for company and succor..."

From the very beginning Laissez Faire Books has carried titles by Rothbard, Ludwig von Mises, Lysander Spooner, Albert Jay Nock, and Robert Heinlein...

But the book I'm most excited about right now is Ron Paul's "Lost" Gold Bible...

That's why I'm doing all I can to make sure you get this book for FREE.

And it doesn't stop with the book. I'll also help you with a "rubber meets the road" strategy that's designed to deliver you actionable investment recommendations.

More on that in a moment. First you have to get the book...
And here's a little more of what you'll find inside:

- * Why government-directed inflation can NEVER match the growth of the economy
(and why price stabilization is a foolish goal anyway) (pp 12, 13)
- * How to tell when a man is lying (hint: they hate gold) (p 183)
- * Why \$15,000 gold is likely inevitable, BUT why it isn't a GOOD thing for investors...(p 198)
- * The proof to why a return to a gold standard is only a matter of "when," not "if"...and why it could make everyone richer (especially those who read the Gold Bible and knew what to do ahead of time) (p 177)
- * Why owning a few gold coins or gold mining stocks will hardly help you if the dollar isn't backed by gold (p 199)
- * Why you shouldn't buy another ounce of gold — OR any mining companies — until you read what Dr. Paul says on page 198.
